"We need not pause to inquire why the herees of our war, when dead, find their high place in history so promptly, and with such infallible orizinty. The strange thing is that we do not think of this while the hero is living. It is for army societies of severy name and grade to see to it, that instice is done before it is too late. Happily here to night no effort is required to "sach the desired result. In Grant's capital book—in that volume that ever soldier reads, already published, you will find on I know not how many different pages, that there was one man that he knew like a book, and that he leaned upon shal loved and trusted like a brother. His name, before I speak it, is in the mince and on the tongue of every soldier present—from Wm. T. Sherman."

The address was listened to with growing interes, and when at the close the mame of Sherman was amonneed an ovation followed. When the applause had subaided, Gen Sherman togan his address upon the libratrinas commandation in the follow of Louiles and Companions in a glorious cause

## LAILROAD REGILATION

About a year ago congress authorized the unprinted a special committee to collect the hea-espair facts on which to base a plus for regular tion of luter state rallway traffic, and the transcontinental rationals The report of this dom-nities has just hear published. It is a volume general subject of railway traffit, and to the

The power has been questioned by strict constructionists of the constitution, but the committee say they have no doubt on the subject. After reviewing at leagth the decisions of the supreme court of the Polited States on that point they say "From the judicial construction of ord commerce by the court of last resoul, it is apparent that it has a very wide meaning, as employed in the constitution, and that it includes not only intercourse and traffic, but also the channels through which, and the agencres by which such iff ercourse and traffic may by This is an explicit seartion of the power of congress to regulate the roads in ques-

The committee have also exhaustively emed the judicial decisions of the faderal tribu nais, and other recognized authorities, with a Firw to settle the much discussed question of tablished principles, and will afford very good reading to those who have been wont to assert that the state has no more right to present a the charges of a railroad than it has to prescribe the prices of boots and shoes. This is what the

No nonpmon carrier has the right, under the com man law, to discribilitate between jersons and places, or to give preference in any manner. The theory of the common law is that all who ara studied alike must be treated take to just disgrammation. I the chief cause of complaint deginet the managestest of rathroads in the conduct of business, and prives rise to ruch pressure upon congress for less stile limitation. Rull road companies are not disposed to perard themselves as histographic office and to and to the public, as expressed in the anneant aw They do not deal with each office alike. They discriminate between persons and between man law, to discrin in ato between persons and discriminate between persons and between places and states, and congress is consequently called on to in some way enforce the plate print called on to in some way enforce the plate print class of the common law for the protection of the propie against the interfal conductof can men carriers in carrying on the commetes of the country - Ratheau torporations necessarily rest under some chilgs tions to deal as fairly and

rest unit; "onle outs to deal as fairly and equitably with all the mixens, without favori-bin or discrimination, as the state itself." Abcompanying the apart is a proposed hill for boppressional regulation of inter-state rouls. The committee say the bill is framed with a view to prevent all kinds of union discriming riew to prevent all kinds of thisses discrimination; to issure proper facilities for tradic, and for interchange of traffic between connecting rowds, and to prohibit a greater charge for a shorter distance than for a longer jone. The bill pray des far the appointment by the ip was dea, of five commission are to take charge for restricting of the portugues.

existiction of its provisions.

This subject can be reached and leaf with only by national legislation. The states alterritories cannot possibly agree on the stres mecessary to meet the conditions of inter-st te traffic. Full power is lodged in congress to the traffic. Full power is lodged in congress to there is much reason to doubt whether i will be plently exerted. The great rulway and a actions, and puriscularly these that confidence transcontinental roads, will be likely to id means to defeat the bill

In point of fact the men who deplike the remail of outlawry at Senttle are the orderly ci i zens who have from the first foreseen the spertable result of the unit-Chinese agitation as moved and controlled by unprincipled and trresponsible men. He who sulvels in ill-assuu +1 dismay over the result that he has labored with traff; speech and incendiary action to compass, in as insincers now as he has been mischisvous from the beginning. I is not possible to regret a calcimity and yet glorn in the misc life that led to it. In the view of The Original the association that brought this thing about is deplorable. FORESTRY EDUCATION

To people who live in an abundant'r tiribered region he science of forestry as developed by the careful study of chimatic conditions as governec by the lack or presence of trees is, generally speaking, of little nterest. To the 11habitante of the great prartie states, and of partions of the eastern and middle states that have been denuded of their forests by the nee is o acre culture or to meet the common wants of civiliza-

## EDUCATIONAL VAMPILES

The public schools of San Francisco seem to present an inviting field to schemens and those who seek to pick their living off the tax, spers of the city. Now it is an "ari hinotic ta ) et." sitly introduced and sold at the som of ten siyly phroduced and sold at the som of ten-cents, leaving a clear profit of nine couts to the inventor and again it is a fisher-wiper," for which fitteen cents is charged, leaving a like proportion of profit to the enterprising genius that produced it. These things appear at first glance as too small to deserve serious notice, yet, taken in conjection with the fact that there are at least 10,000 "slate-wiping" children in the public sed cods of that city, the scheme does not appear to ally insemplicant in a financial view. appear to ally ineignificant in a financial view. The schot is. - we may say the taxpayers. - are latter is in the habit of saying to the people, in connection with the studies that their chil ren shall purpue "fo this," and the people, to \*Ballroads 2re everywhere recognized as con a soul froble and annoyance, do it. Fet it seems that the ten-cent "arithmetic ablet" man and the frieducent "slate-wiper agent succeeded in hiroducing their wares with a fair prospect of reaping a harvest in a single season from utterly triling articles, aggregating a profit of many thousands of dollars. The lethingy and mild ference of the people alone remore the success of such schemes as this possible. They are too authorized by the board Teachers are also en of such schemes as this possible. They are too apt everywhere to fall back uppn a blind adr a tion of the public school system, trusting that averything that is done in the same is done or its benefit. Education il sharpers are not slow to take advicatage of this tindness, and the lead to the tax myer's pocket is in consequence of en worked for all that it will yield. Of course such worked for all that it will jield. Of course at the schemes is the above could not be successful but with he knowledge of the school board. The bond is invested with pichary power that is subject only to the popular will. A simple complaint against an abuse so flagrant is all that is niprepary to bring out the trul concerning it, and it is not believed that even a school logical to require the profile of the popular is city as fell of efficial corruption as all intransact would have the bordlood to Sain Francisco would have the hardhood to councing a n \$10.00 der in pointer from the tax payers unless its share in previous transitions of the kind would warrant its members in

The chief lead to the property of lax payers in the name of our public achief system in this cli as vet, has run in the irrection of ormits buildings. The inquiring units developed on the part of the people by the procedure presented the read from being northed as thorough how was planned, yet the size of the bils was smooth to open the eyes of all to the langer of trusting too much to the supposed or idence of others when they were required to meet the expense. The lesson was a timely one, and it will not prove an expensive one in the outcome if it teaches individual responsibility in connection with public school matters.

A convention of the people of California, respective of party, who are opplosed to Chune a labor, was both at San Jose last Fricay. The session was a very quiet, orderly one, and that his was so is principally due to the fact that he people who composed the convention would have for high to do with the irresponsible, hatant demagogues, who always on eavor to cost themselves upon any popular movement. Soroner O'D much, of San Frankison, is a fair semple of this class of would-be "Sandgus," whose name alone, connected with any move-ment, is sufficient to bring it at once into disce-pute with every good cidran. The sustainer

and overwhelming unanimity with which the San Jose convention sat down in Coroner U Donne I should convince that persistent dem agogue and all of his ik, including those now inciting a class of pecu e in this city to deeds of riching a class of perty in this tip to decay with a violence, that laboring one of intelligence look upon his agregious vanity with density con tempt. Origin of this II a.verse

Ours is emphatically a critical age The inconoclast, with his rath ess hand, is at work everywhere. There is nothing so escred, a thing so time honored, nothing so escred, a thing so time honored, nothing so well established in politics, in religion, in this try or in science but the décomposing acid of daring crisitism finds a flaw where he can eather ad destroy the long cherished structure. Or ticisin, i ke a midern vandal, has invaded the wed enupped directles of our race and playad havic with four dolls and hobbies and playads havic with four dolls and hobbies and playads havic with four delies afforded us such keen en opinent, even if they were celusions. We feel as though we were vandering dover a wild, treacherous bog, where a fill is oncertainty and decopition, except where a few rarrow grants ledges of mathematical demonstration afford colld focung. When kind and las Place allyanced their cosmogony their nebular theory the work, was delighted with this new toy. The theory became an article of faith in the scientific world. It was so plain so supple so comprehensive, and secreted to explain the phenomena of the heavens in a clast of high sample of the world of the an epic poden, like a grand oratorio of crea ion such as filled when the morning stars are sung to tether.

When the morning stars are sung to other;
That theory, although emanating from brains of pure scientists, ranks with the grandest and not pure scientists, ranks with the grandest and most inspired conception of a post, furnishers for their proof of the fact that lively, fortile magnation is donucled in the laboratory of the post of the scientist as well as in the library of the post.
